Approvals for Confluence is an integrated approval tool that enables teams to get their work reviewed and approved by the right people without leaving Confluence.

Teams no longer have to waste time working across multiple siloed tools, trawl through endless email chains, or experience confusion over the latest version of a document. Everything can be managed in one place.

*Bring your review and approval process into Confluence*

Use Cases

Approvals for Confluence is a simple yet powerful review and approval tool thats integrated into Confluence. It supports a variety of use cases:

- Content review and approval by designated stakeholders
- Compliance with internal document management policies and procedures
- Improved document quality control
- Gathering expert feedback on documents in Confluence

For more information about Approval's use cases, please refer to our documentation: **Cloud | Data Center**

It's important to note that Approvals is designed to be simple on purpose. If you require a more customizable review and approval process, we recommend you check out our other document management app, **Workflows for Confluence**.

Choose the approval type that is right for you

Benefits

Approvals for Confluence makes the review and approval process effortless for everyone. It has been designed to be intuitive and easy to use, so technical and non-technical teams can get up and running in a matter of minutes, and experience a wide range of benefits.

- **Manage your approvals in one place:** Your team can easily manage approvals in one place (Confluence), reducing the risk of information silos or bottlenecks by having to use multiple tools. Approvals for Confluence will ultimately give you better visibility and control of your document approval processes.
- **Request approvals at the click of a button:** Approvals is easy-to-use and intuitive, allowing you and your teammates to request document approvals in a matter of seconds.
- **Get content reviewed by the right people:** Customize the approval process so it's tailored to your specific needs, policies, and procedures relating to document approvals.
- **Quickly gather feedback from experts or required stakeholders:** feedback is a gift and Approvals makes it easy to gather feedback from the right people without leaving Confluence.
- **View feedback in context:** see the feedback from your approval team in one place so you can quickly update and amend documents to address the comments raised.
- **Get up and running in seconds:** Approvals is built to be intuitive. You can get up and running in seconds without an complex configuration or setup required
- **Make the approval approval process easy for everyone:** Bring your entire review and approval process into Confluence with a tool thats easy for everyone to use; from page creators to the review and approval team.

Don't just take our word for it

"Great app and very responsive team. We use it to approve documents required for computer system validation. Very helpful is the fact, that approvals can additionally be saved as comments on the document."

Ramon Saccilotto
