

Compliance for Confluence is an integrated data loss prevention (DLP) tool that helps businesses organize, manage, and better protect the different types of information they store in Confluence.

It can help you ensure company data-handling policies and processes are being followed by the teams using Confluence.

*Protect your data in Confluence with page classification, restrictions, and sensitive data detection*

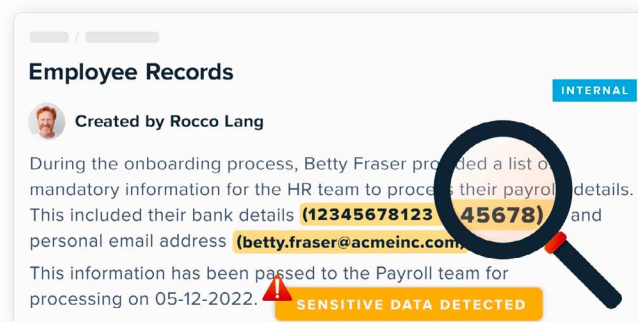

## Use Cases

Compliance for Confluence has been designed with data loss prevention in mind, and as a result, addresses a number of important use cases:

- Classification of information stored in Confluence
- Assigning enhanced access restrictions to different content types
- Detect sensitive data stored in Confluence pages
- Automatically protect sensitive data upon discovery\*

*\*the automated sensitive data protection is only available in Data Center version of Compliance.*

For more information about Compliance for Confluence's use cases, please refer to our documentation: [Cloud](#) | [Data Center](#)

*Detect sensitive data stored in Confluence pages*

## Benefits

Data protection in Confluence is critical to every business and with Compliance for Confluence by your side, you can experience a number of important benefits.

- **Categorize data based on its sensitivity or risk:** label data using classification levels to clearly categorize it and promote awareness of its sensitivity
- **Align page access to your policies:** grant user or group access to Confluence content using classification levels and ensure only the right people can view the right content
- **Discover and protect sensitive data:** find sensitive data stored in Confluence pages and lean on Compliance to automatically protect this information for you\*\*
- **Identify risks you can take action:** use Compliance to help identify areas of risk so you can make informed decisions and take action
- **Mitigate risk of data exposure:** harness the powerful features in Compliance for Confluence to help you mitigate risk or enforce your data protection policies in Confluence.

\*\*the automated sensitive data protection is only available in Data Center version of Compliance.

## Feature Comparison

## Help & Support

We're here to ensure you have the best experience possible when using our products and have a range of resources available to help you get the most out of Compliance:

- **User Guides** – these guides will show you how to use all of the features in Compliance and answer some of the most common customer questions
- **Video Tutorials** – get a step-by-step walkthrough of all the core features in Compliance with our range of video tutorials
- **Customer Support Team** – our support team can help you with any questions or technical queries when using Compliance. The team is based in the UK and is available during business hours (Mon-Fri, 09:00 - 17:30 GMT/BST, excluding bank holidays).

## Migration requirements

---

There is currently no automated migration pathway in place to migrate your Compliance for Confluence data from Server or Data Center to Confluence Cloud.

If you do decide to move to Confluence Cloud, you can use the **bulk classification** feature to streamline the page re-classification process once you are set up in your cloud environment. This feature will enable you to classify a large number of pages in a matter of minutes.

**Top tip:** we are planning to release an automated migration assistant that will make this process easier for you and your organization. For now, please use the advice stated above.

If you have any questions about the migration process or would like to speak with one of our experts, please don't hesitate to **[reach out to our customer support team](#)**.
