

Compliance for Confluence helps teams organize, manage, and safeguard sensitive information across your entire instance. It detects hidden sensitive content, ensuring compliance and alignment with company policies so your data stays secure and your team stays on track.

*Protect your data in Confluence with page classification, restrictions, and sensitive data detection*

## Use Cases

Compliance for Confluence has been designed with data loss prevention in mind and as a result, addresses a number of important use cases:

- **Classifying sensitive data:** Automatically label and categorise pages based on their sensitivity.
- **Applying access permissions:** Restrict access to specific pages for any individual or team.
- **Identifying sensitive information:** Scan Confluence pages within an entire space to identify sensitive data.
- **Automated protection actions:** Automate actions that can limit access to pages or mark pages as restricted once sensitive data is detected.

With Compliance for Confluence, teams can seamlessly manage and protect sensitive content while ensuring compliance with company policies.

For more information about Compliance for Confluence's use cases, please refer to our documentation: [Cloud | Data Center](#)

## Benefits

Compliance for Confluence focuses on data loss prevention and addresses different user cases:

- **Categorize sensitivity data:** Label data using classification levels to categorize it and promote awareness of its sensitivity.
- **Align page access to your policies:** Grant user or group access to content using classification levels and ensure only the right people can view the content.
- **Detect and protect data:** Detect hidden sensitive data and lean on Compliance to automatically preserve this information for you.
- **Identify risks and take action:** Use Compliance to help identify areas of risk so you can make informed decisions and take action.
- **Mitigate exposure risks:** Leverage Compliance tools to enforce data protection policies and reduce exposure.

### Employee Records

INTERNAL

Created by Rocco Lang

During the onboarding process, Betty Fraser provided a list of mandatory information for the HR team to process their payroll details. This included their bank details (12345678123 45678) and personal email address (betty.fraser@acmeinc.com). This information has been passed to the Payroll team for processing on 05-12-2022.

SENSITIVE DATA DETECTED

Don't just take our word for it

"This is a great product with great developers who care about the customer experience. We couldn't be happier with the current functionality and are excited for future development."

Joseph Isom

Atlassian Marketplace

## Feature Comparison

There are some differences between the cloud and data center/server versions of Compliance, as detailed in the table below:

PAGE ACCESS RESTRICTIONS	DATA CENTER & SERVER	CLOUD
Data Classification		
Page Classification Levels	✓ Available	✓ Available
Customizable Levels (e.g. name, description)	✓ Available	✓ Available
Data Classification Search	✓ Available	✓ Available
Bulk Classification	✓ Available	✓ Available
Enforce Classification (e.g. pages cannot be created/ updated without a classification level being chosen)	✓ Available	✓ Available
Classification Statistics	✓ Available	✓ Available (currently limited to individual users)
Data Classification Macro (on-page)	✓ Available	✓ Available
Page Access Restrictions		
Automated Restrictions (based on classification levels)	✓ Available	✓ Available
Sensitive Data Detection		
Detect Sensitive Data	✓ Available	✓ Available
Sensitive Data Search	✓ Available	✓ Available
Redact Sensitive Data	✓ Available	✓ Available
Automation Rules	✓ Available	✓ Available
"Allowed" content list	✓ Available	✓ Available
Other		
Schemes (control how levels and restrictions are applied)	✗ Not available	✓ Available

## Migration requirements

---

There is currently no automated migration pathway to migrate your Compliance for Confluence data from the Server or Data Center to Confluence Cloud.

If you decide to move to Confluence Cloud, you can use the **bulk classification** feature to streamline the page re-classification process. This feature will enable you to classify many pages in minutes.

If you have any questions about the migration process or would like to speak with one of our experts, please don't hesitate to **reach out to our customer support team**.
