# Compliance for Confluence

Manage and safeguard information more effectively. Reduce the risk of data breaches and strengthen regulatory compliance, now made easier with AI! Scan pages and flag content that may need a higher classification, so sensitive information is easier to identify and protect.

"We needed to know who could access what, when, and why without burdening users."

ViNotion, Real-time image analysis

## USE CASES

### Data classification

Organize content by sensitivity and risk using consistent classification levels.

### Enhanced access controls

Control page access based on data classification levels.

### Detect sensitive data

Prevent accidental exposure by scanning pages for sensitive information.

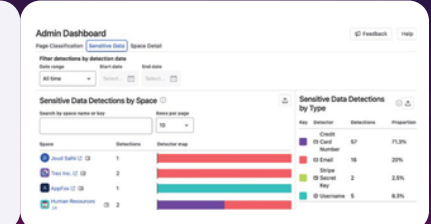

### REST API integrations

Seamlessly connect compliance data to your wider tech stack.

## Protect sensitive data and strengthen compliance across Confluence.

### Detect sensitive data

Automatically find, protect and redact hidden sensitive data in real-time, such as email addresses, phone numbers, identity document numbers, and more. You can also now detect API keys, including AWS, Stripe, Google and GitHub.

### Scope: Classification Levels

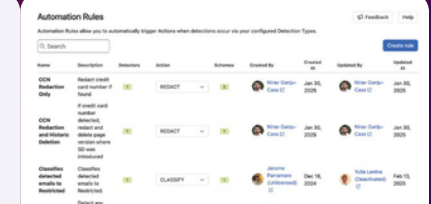

Manage Globally ☒   
Global Settings   
Use this section to apply settings globally across the system, overriding Space Settings.   
Default Space Settings   
Configure the default settings for newly created spaces. Once created, space settings can be updated in the Space Settings table to override these defaults.

### Classify and restrict content

Create classification levels to label content by sensitivity and restrict access for specific users or teams.

### Trigger actions when sensitive data is found

Automate actions to protect sensitive information, with powerful features like email notifications or redacting sensitive text.

### Space Settings

| Space                 | Type     | Classification | Level      | Default Classification | Default Restriction | Restriction | Restriction Scheme |
|-----------------------|----------|----------------|------------|------------------------|---------------------|-------------|--------------------|
| Jerome's Space (C)    | INTERNAL | RESTRICTED     | RESTRICTED | RESTRICTED             | RESTRICTED          | RESTRICTED  | RESTRICTED         |
| Abby-Marie Flood (C)  | INTERNAL | RESTRICTED     | RESTRICTED | RESTRICTED             | RESTRICTED          | RESTRICTED  | RESTRICTED         |
| Project Stardust (C)  | INTERNAL | RESTRICTED     | RESTRICTED | RESTRICTED             | RESTRICTED          | RESTRICTED  | RESTRICTED         |
| Joud-test (C)         | INTERNAL | RESTRICTED     | RESTRICTED | RESTRICTED             | RESTRICTED          | RESTRICTED  | RESTRICTED         |
| Jennifer Ross (C)     | INTERNAL | RESTRICTED     | RESTRICTED | RESTRICTED             | RESTRICTED          | RESTRICTED  | RESTRICTED         |
| Barbara Cernakova (C) | INTERNAL | RESTRICTED     | RESTRICTED | RESTRICTED             | RESTRICTED          | RESTRICTED  | RESTRICTED         |
| Project Beta (C)      | INTERNAL | RESTRICTED     | RESTRICTED | RESTRICTED             | RESTRICTED          | RESTRICTED  | RESTRICTED         |
| Team 24 (C)           | INTERNAL | RESTRICTED     | RESTRICTED | RESTRICTED             | RESTRICTED          | RESTRICTED  | RESTRICTED         |
| Customer Success (C)  | INTERNAL | RESTRICTED     | RESTRICTED | RESTRICTED             | RESTRICTED          | RESTRICTED  | RESTRICTED         |

### Connect compliance data

Enable programmatic access to classification levels, data detections, and more. Automate compliance workflows, extract insights, and integrate with external tools securely from within Compliance for Confluence.
