Optimizer for Jira

Whether you're preparing for migration, maintaining configurations or keeping a growing Jira instance healthy, find Jira bloat, duplication and configuration issues in seconds. Create health reports to see what needs attention, then remediate at scale with bulk actions.

NEW!
Optimizer Rovo Agent

"From cleaning up after migrations, to preparing for a significant site merger - an amazing tool."
Avalara, Tax compliance software

USE CASES

Jira migration preparation

Audit, clean up, and prepare your Jira for a successful migration.

Jira health assessments

Monitor and track the health of your Jira over time.

Configuration maintenance

Manage projects, fields and other configurations with ease.

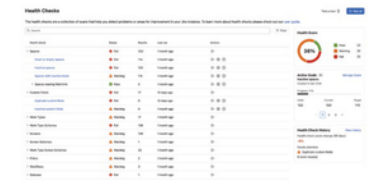

Clean ups and optimization

Perform small or large-scale Jira clean ups effortlessly.

Keep track of your Jira's health with health check reports, site audits and bulk actions.

See Jira health at a glance

Bring projects and configurations together in one view, so you can quickly identify issues and prioritize where to focus.

Duplicate custom fields

Name	Duplicates	Type	Confidence
[CHART] Date of First Response	5	%	95%
Flagged	3	%	
Impact	2	%	
Epic Link	2	%	95%
Story point estimate	2	%	95%
Hosting	2	%	95%
Approvals	2	%	95%
Satisfaction	2	%	95%

Clean up Jira at scale

Use smart tables, bulk actions and inline editing to remove clutter and make large-scale changes faster.

Prepare Jira for migration

Identify configuration issues and migration blockers before you start, helping reduce avoidable problems later.
