

Workflows for Confluence

Strengthen compliance measures, eliminate hours of manual work and standardize your teams' approach to quality assurance. Create and customize document workflows seamlessly within Confluence.

NEW!
Branching workflows

"We can now verify every piece of content that gets added – that's like a superpower."
Rainfocus, All-in-one events and marketing platform

USE CASES

Controlled document approvals
Review, approve and version important documents.

Approval-to-publish workflows
Publish content only after the right checks are complete.

Periodic review and expiry
Keep controlled content current with scheduled reviews and expiry.

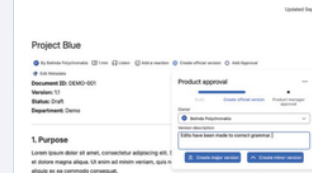

QMS and compliance workflows
Manage controlled documents in line with regulatory requirements.

Control reviews, approvals and publishing across the document lifecycle in Confluence.

Control how content publishes

Build multi-stage approval and publishing workflows with custom page statuses, labels and cross-space publishing, so content reaches the right destination only after the right checks.

Project Blue

Page ID	Page Title	Version	Version Description	Version Owner	Version Created	Version Approved	Approvals
1303837514	Project Blue	0.1 (1)	Edits have been made to content grammar.	Berinda Polymarkets	Sep-11-2026, 16:34	Sep-11-2026, 16:35	Product manager approval

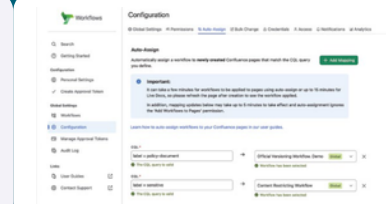

Document ID: DEMO-001
Version: 1.1

Stay compliant and secure

Use audit logs, control tables and metadata macros to keep content governance visible and support alignment with ISO 27001, ISO 9001, HIPAA, MDR, NIST, NIS2 and more.

Manage workflows at scale

Create and apply multiple workflows in bulk across multiple pages, including version control and MFA/2FA to keep accountability built into the process.

Build workflows that adapt

Mirror your unique document management processes and send documents down the right path with workflows that branch into unlimited directions.
